FOREWORD

In so small a folder we will not even attempt to list anywhere near all of the varieties of plant materials that we carry in stock most of the time. Roses and perennials we will not list here as we are putting out separate lists for these items.

We will attempt to somewhat classify various plants according to their size, shape or use. We will just list a few of the most outstanding in each classification and will list all of the unusual plants that we carry that are not commonly listed by most nurseries in this area.

In the listing of some ornamentals the term "B&B" is used which means balled and burlapped. After the listing of some trees the word "cal." is used. This means caliper of the stem usually measured one foot above the ground. The caliper is usually given in inches. Where calipers is not designated the dimension given after a plant means height except in the case of spreading evergreens, such as Spreading Yews, Pfitzer junipers, Andorra junipers, Hetz junipers, Intermediate Yews and plants of this growing habit.

Our experience has been that most plants can be transplanted in the spring or fall equally well. Current moisture and temperature conditions and methods of planting are more important factors. Other important factors include the acidity or alkalinity of the soil, the amount of drainage, and the texture of the soil. While many plants are tolerant of many conditions, to a degree, there are certain others that will not thrive except under certain specific limited conditions. We will designate any such limited plants, and what they need.

OUR GUARANTEE

We guarantee all plants for the first 30 days. We guarantee that all plants are in good growing condition at the time of sale, and are true to name to the best of our knowledge. We also guarantee to replace any plant that fails to live the first year at half of the purchase price of the plant **at time of replacement**. All labor involved is charged for at the full price. The exceptions to the above guarantee are: (1) If the account is not paid in full. (2) If the purchaser does not give the plants the proper care; such as failure to water sufficiently or fail to cultivate at proper intervals. Or to keep the plant free from injurious insect pests thru lack of spraying (3) When the plant dies thru Act of God. (4) When orders are sold at a discount.

TERMS

25% deposit on all orders for nursery stock and materials; 50% deposit if the order is 50% or more labor.

Unless special arrangements have been made with our office, all orders are cash on delivery or at completion of work.

Minimum labor or service charge	\$4.50
Hourly rates. Formen	\$3.50 per hr.
All other labor	\$2.50 per hr.

The best planting times of the year are between March 15th and June 15th in the spring and between August 15th and December 1st in the fall. This varies with the year. Plants that are potted or sold balled and burlapped have a considerably longer planting period.

EVERGREENS

UPRIGHT EVERGREENS

JUNIPERUS CHINENSIS COLUMNARIS. Chinese column Juniper. A narrow, close knit, very hardy juniper. Blueish green. One of the hardest of all junipers.

3-4 ft.	\$11.00
4-5 ft.	15.00

TSUGA CANADENSIS. Canadian Hemlock. Fine, lacy foliage, medium dark green and will grow in shade better than most evergreens. Will stand hard shearing.

2½-3 ft.	\$10.75
----------	---------

TAXUS CAPITATA. Japanese Upright Yew. For home foundation planting, this is one of our best upright evergreens. It grows well in our climate, maintains a nice dark green color thruout the entire year, and will stand a lot of heavy shearing.

2-2½ ft.	\$11.50
2½-3 ft.	13.75
3½-4 ft.	20.00
6-6½ ft. specimens	62.50

TAXUS HICKSI. Hick's Yew. Similar to the above but not conical in habit of growth. One of our best Yews.

18-24 in.	\$ 8.50
2-2½ ft.	10.50
2½-3 ft.	13.50

PICEA PUNGENS GLAUGA. Colorado Blue Spruce. Symmetrical growing, blueish green foliage in different degrees of blue. Usually planted as specimens where they have room to grow.

18-24 in.	\$ 8.25
24-30 in.	11.00
30-36 in.	15.00

PICEA PUNGENS MOERHEIMI. Moerheim's Blue Spruce. While these grafted Blue Spruce are usually not as symmetrical as the seedling Colorado Blue Spruce they are all a good blue and are grafted to perpetuate the nice long needles and good blue color.

2½-3 ft.	\$32.00
----------	---------

THUYA OCCIDENTALIS PYRAMIDALIS. Pyramidal Arborvitae. Used as the main upright evergreen on a majority of foundation plantings for years.

18-24 in.	\$4.00
2-2½ ft.	5.00
2½-3 ft.	6.00
3-3½ ft.	8.00
3½-4 ft.	8.50

SPREADING EVERGREENS

JUNIPERUS PFITZERIANA. Pfitzer juniper. Best known of the spreading junipers. Used extensively in foundation plantings under windows and in front of low porches.

15-18 in.	\$ 4.50
18-24 in.	7.50
24-30 in.	9.00
30-36 in.	15.00

LILACS LIKE AN ALKALINE SOIL

JUNIPERUS HETZI. Hetz juniper. Similar to the pfitzer juniper in texture of the foliage but with a bluer caste. It is also a little more upright in habit.

2-2½ ft. 8.00

TAXUS CUSPIDATA. Japanese Spreading Yew. The same dark green foliage of the Upright Yews but with a spreading habit.

15-18 in. \$ 8.50

18-24 in. 10.00

24-30 in. 16.00

TAXUS INTERMEDIA. Intermediate Yew. Similar in habit to the above but slightly slower growing, darker green and more compact.

15-18 in. \$ 7.25

18-24 in. 9.50

AZALEAS and RHODODENDRONS

While the Azaleas mentioned here are all deciduous and the Rhododendrons are classed as broadleaf evergreens, we will never-the-less put them into the same classification because they like the same soil conditions and much the same culture. They both like an acid soil, the Rhododendrons to a larger degree than the Azaleas, and both like to be undisturbed as far as close cultivation is concerned. We prepare a special soil for these plants.

AZALEA MOLLIS. Chinese Azalea. Various shades of pink, salmon, red, orange and yellow.

12 to 15 in. B&B \$ 5.00

15 to 18 in. B&B 6.00

AZALEA MOLLIS, VAN TOL. One of the best of the Mollis Hybrids. This grafted variety is a deep coral flame color.

15-18 in. B&B \$ 9.50

RHODODENDRON CATAWBIENSE GRANDIFLORA.

Lavender Rhododendron. Soft, lilac-lavender flowers, the hardiest of the Hybrid Rhododendrons. 18-24 in. B&B \$12.00

DECIDUOUS SHRUBS

T A L L S H R U B S

EUONYMUS ALATUS. Winged Burning Bush. This shrub grows about 8 ft. tall and is best noted for its brilliant scarlet foliage early in the fall.

2-3 ft. \$ 2.50

EUONYMUS YEDDOENSIS. Yeddo Viburnum. Tall growing bushy shrub with berries similar to Bittersweet appearing in the early fall. Red fall coloration.

3-4 ft. \$ 1.50

FORSYTHIA SPECTABILIS. Showy Border Forsythia or Golden Bell. This valuable shrub is covered with bright yellow bell shaped flowers the first thing in the spring.

3-4 ft. \$ 1.50

4-5 ft. 2.00

HIBISCUS SYRIACUS. Rose of Sharon. A tall upright growing shrub blooming in August and September. We have in separate colors: double red, double pink, double purple, double white, single red, and single blue.

3-4 ft. \$ 1.50

KOLKWITZIA AMABILIS. Beauty Bush. A vigorous growing bush with an ultimate height of over 8 ft. that blooms in June with myriads of pink bell shaped flowers.

2-3 ft. \$ 1.50

LONICERA TARTARICA RURBA. Pink Tartarian Honeysuckle. Very vigorous grower, up to 10 to 12 ft. Used very often for screening purposes.

3-4 ft. \$ 1.50

4-5 ft. 2.00

PHILADELPHUS CORONARIUS. Single Sweet Scented Mockorange. Up to 10 ft., upright grower, single scented white flowers in June. Vigorous grower.

3-4 ft. \$ 1.50

PHILADELPHUS VERGINALIS. Double Mock-orange. Similar to the above, but not so tall and with double flowers.

2-3 ft. \$ 1.50

3-4 ft. 2.00

SYRINGA VULGARIS. Common purple lilac.

2-3 ft. \$ 1.25

3-4 ft. 1.50

SYRINGA, FRENCH HYBRIDS. French lilac. We usually have a half dozen varieties.

2-3 ft. \$ 2.00

3-4 ft. 3.00

VIBURNUM AMERICANUM. American Highbush Cranberry. 8-10 ft. Bright red berries in the fall. Good background shrub.

3-4 ft. \$ 1.50

VIBURNUM DENTATUM. Arrowwood. A desirable upright growing shrub adaptable to most conditions but will tolerate a rather wet soil condition better than most.

3-4 ft. \$ 1.50

VIBURNUM OPULUS STERILIS. Common Snowball. Everyone is surely acquainted with this.

3-4 ft. \$ 1.50

VIBURNUM SIEBOLDI. Siebold Viburnum. Very large leaves, graceful upright habit. Purple berries in the fall.

3-4 ft. \$ 1.50

WEIGELA ROSEA. Pink weigela. Pink bell shaped flowers borne in great profusion—June.

3-4 ft. \$ 1.50

MEDIUM TALL SHRUBS

CYDONIA JAPONICA RUBRA. Red Flowering Japanese Quince. Bright red flowers, very early in the spring.

2-3 ft. \$ 1.50

EUONYMUS ALATUS COMACTUS. Dwarf Burning bush. Best noted for its compact habit of growth and its beautiful red fall coloration.

18-24 in. \$ 2.75

HYDRANGEA ARBORESCENS. Hills of Snow. Mid-summer bloomer with large white blooms often having a greenish tinge. Good shade grower.

2-3 ft. \$ 1.50

HYDRANGEA P.G. Fall Hydrangea. Fall blooming with flower larger than the preceding and flowers white shaded coppery pink.

2-3 ft. \$ 1.50

PHILADELPHUS AUREA. Golden Syringa. While this beautiful golden leaved shrub is more often than not trimmed down to small size as a filler among evergreens for contract, it will never-the-less, grow to at least six feet if left alone.

12-15 in.	\$ 2.00
15-18 in.	2.50

PRUNUS GLANDULOSA. Pink Flowering Almond. This bush is just covered with sweet scented double pink flowers in May. Very showy.

2-3 ft.	\$ 2.00
---------	---------

PRUNUS GLANDULOSA ALBA. White Almond. A white form of the preceding.

2-3 ft.	\$ 2.00
---------	---------

PRUNUS TRILOBA. Flowering Plum. Similar to the above only larger flowers and little more vigorous habit of growth.

2-3 ft.	\$ 2.50
---------	---------

SPIREA PRUNIFOLIA. True Bridal Wreath Spirea. Similar to the old fashioned common bridal wreath only this has small delicate individual flowers borne up and down the stem. Unusual.

3-4 ft.	\$ 1.50
---------	---------

SPIREA BILLARDI. Pink Plume Spirea. Attractive shrub with rose-pink spire coming late spring.

3-4 ft.	\$ 1.50
---------	---------

WEIGELA EVA RATHKE. Grows usually no more than 5 feet. Heavy bloomer with red flowers — June - July.

3-4 ft.	\$ 1.50
---------	---------

LOW GROWING SHRUBS

BERBERIS THUNBERGI. Japanese Barberry. Dwarf bushy plant with many small thorns end with bright red berries in the fall. Good for borders and hedges.

15-18 in. each	45c	— \$40. per 100
18-24 in. each	55c	— \$45. per 100

BERBERIS ATROPURPUREA. Red Barberry. Same as above but with red to reddish foliage.

12-15 in.	.45
15-18 in.	\$.65
18-24 in.	.75

DEUTZIA LEMOINE. The hardiest of the Deutzias in this climate. Seldom of 2½ feet with pinkish-white flowers borne in great profusion up and down the stems in May.

18-24 in.	\$ 1.25
-----------	---------

SPIREA FROEBELLI. Dwarf Pink Spirea. A bushy dwarf shrub growing usually less than three feet tall. Rosy pink bloom in late spring.

18-24 in.	\$ 1.25
-----------	---------

SHADE TREES

ACER DASYCARPUM. Silver Maple. Fast growing rather open branched maple common throughout this area.

1½-2 in. cal.	\$ 7.50
---------------	---------

ACER PLATANOIDES. Norway Maple. Low branching compact tree with very large dark green leaves. An excellent shade tree.

8-10 ft.	\$ 8.00
----------	---------

ACER PLATANOIDES SCHWEDLERI. Same as above with reddish leaves.

8-10 ft. \$10.00

ACER PLATANOIDES SCHWEDLERI NIGRA

Crimson King Maple. A variety of the preceding that holds its red color thruout the whole season.

6-7 ft. whips \$.5.50

SALIX BLANDA. Wisconsin Weeping Willow. Fast growing willow with graceful drooping branches.

9-10 ft. \$ 9.00

ULMUS AMERICANA. American or White Elm. Tall growing, high headed tree often used for street planting.

2-2½ in. cal. \$22.50

2½-3 in. cal. 25.00

ORNAMENTAL TREES

MALUS. Flowering Crabs. We have the following varieties:

SARGENTI. Light pink. 3-4 ft. \$2.00

BLEYII. Rose. 4-5 ft. \$2.75

FLORIBUNDA PURPUREA. Rose-red. 4-5 \$2.75

HOPA. Red. 5-6 ft \$2.75

BECHTEL'S. Double. Light pink. 3-4 ft. \$2.50
colored flowers with prickly stems. ea.E9a 5 e7a21

2-3 ft. \$ 1.25

PRUNUS NEWPORT. Purple leaved Plum. A small bushy tree with purplish-red leaves that hold their color throughout the whole growing season.

3-4 ft. \$ 3.50

4-5 ft. 4.50

SALIX DISCOLOR. French Pussywillow. Largest flowering kind.

3-4 ft. \$ 1.25

ROBINIA HISPIDA. Rose Acacia. Beautiful rose. colored flowers with prickly stems.

V I N E S

PARTHENOCISSUS TRICUSPIDATA VEITCHI.
Boston Ivy. The vine you often find growing up brick chimneys.

2 yr. potted \$.75

POLYGONUM AUBERTI. Silver Lace Vine. Vigorous growing vine with lacy white flowers.

2 yr. potted \$ 1.25

GROUND COVER

VINCA MINOR. Periwinkle. Good for shade.
15c each — \$12. per 100
